

Job Description (JD)

Backend Developer – Python FastAPI

Position

Backend Developer (Python/FastAPI)

Employment Type

Contract / Full-Time (3 Months Prototype Phase)

Location

Remote / Hybrid

Project

Regulatory Dossier Management System (RDMS)

About the Project

Rococo is developing a cloud-based SaaS platform called **Regulatory Dossier Management System (RDMS)** for pharmaceutical and life sciences organizations. The platform will manage the complete regulatory lifecycle, including:

- Product Management
- Registration Management
- Structured CTD Dossier Builder
- Document Control System
- Workflow Automation
- Compliance Validation
- Submission Management
- Dashboard & Analytics

We are looking for a backend developer who can take ownership of API development, database design, authentication, and document management workflows.

Key Responsibilities

API Development

- Design and develop REST APIs using FastAPI
- Implement business logic for regulatory workflows
- Create scalable and reusable API architecture
- Develop API documentation using Swagger/OpenAPI

Database Development

- Design PostgreSQL database schema
- Create relationships and indexes
- Write optimized SQL queries
- Manage database migrations

Authentication & Security

- Implement JWT authentication
- Integrate Supabase Auth
- Role-Based Access Control (RBAC)
- API security and permissions

Document Management

- Integrate Supabase Storage
- File upload/download APIs
- Version management
- Metadata handling

Workflow Engine

- Review workflows
- Approval workflows
- Task assignment
- Status management

Integration

- Frontend API integration support
- Third-party API integration
- Email notification integration

Required Technical Skills

Mandatory

Backend

- Python (3+ Years)
- FastAPI
- REST API Development
- PostgreSQL

Database

- PostgreSQL
- Query Optimization
- Database Design

Authentication

- JWT
- OAuth Basics
- RBAC

Cloud

- Supabase
- File Storage
- Environment Management

Development

- Git
- GitHub
- API Documentation
- Postman

Preferred Skills

- Pharmaceutical Domain Knowledge
- SaaS Product Development
- Workflow Engine Development
- Document Management Systems
- OCR Integration
- OpenAI API Integration
- Docker
- CI/CD

Document Control System

- Upload
- Download
- Metadata
- Version History

=====

Screening Assignment

Build APIs for:

- User Management
- Product Management
- Dossier Creation
- Document Upload

Evaluation Criteria

- Code Quality
- Database Design
- API Structure
- Documentation
- Error Handling
- Git Usage
